Pro-Vizi Connect - Creates API's & connect to any portal in hours or days

Need to Connect to a Portal - but don't have an API?

- Lack of an API should not be an impediment to B2B business. Connect to a portal in days and hours with Pro-Vizi!
- Pro-Vizi navigates the portal one wants to connect to, and creates an optimized API within hours or days.

Result- Connection between systems achieved!

- Portal changes that do not add parameters - do not affect the integration
- The Pro-Vizi Platform manages that seamlessly.

Need API's but don't have resources?

- **When solutions are designed** - B2B API's are not in the plan. The focus isconnecting the back end to the front-end. Result there is a myriad of end-points which require pre-requisties before they are called.
- **You have just pushed the Application live** - and now somebody needs an API? Pro-Vizi is your knight in shining armor - delivering optimized API's hosted on Pro-Vizi servers. In days and hours, not weeks and months on a budget that won't break the bank.
- **Need to modify code** - do it confidently, Pro-Vizi's Real Intelligence learns the system and unless new parameters are added, keeps the API interface to the integrators static. This feature is invaluable to business that wants to grow without being shackled to legacy

About Pro-Vizi

- Pro-Vizi is provides a service of converting any interface into an optimized API. The API end-point is hosted on a server in the country the service is rendered.
- One end point with a littany of services - Yes! this simplifies integration. Leveraging the power of JSON structures - this is a reality.
- Once deployed, the API becomes a library on the Pro-Vizi server allowing those with credentials to connect to it and execute B2B transactions.
- Pro-Vizi delivers technology akin to cloud servers that replaced in house hardware. Experience Pro-Vizi to deliver services in real time to drive revenue and meet market demands
